

Water dispenser

Sustainable refreshment
with water dispensers from Grünbeck

sodajet

by grünbeck

FROM TAP TO WOW.

Over 75 years ago, we at Grünbeck were founded on a clear vision: clean drinking water for everyone. Today we define global benchmarks in water treatment, representing durability and award-winning product design.

Hygienic safety is in our DNA – providing confidence you can taste in every sip. Driven by a desire to re-imagine the familiar challenges of water dispensers, we developed the sodajet Office and sodajet Public – delivering premium drinking water for everyone at the touch of a button.

Benefits

of a mains-fed water dispenser

We fill glasses, not bins

Eliminate single-use bottles and transport emissions – tap water has a 600-times lower environmental impact than bottled water.*

Because access to water is a human right

Access to safe drinking water is essential and should be easily available to everyone – including in public spaces.

Refreshment, at the touch of a button

Enjoy premium-grade table water without the logistical hassle or time-consuming effort – no more running out of heavy crates.

Your water, your way

Tastes vary – that's why sodajet dispenses chilled water in three varieties: still, semi-sparkling and sparkling.

Your quality of life is at the heart of everything we do

Standard and optional features ensure total hygiene. The performance of the clearliQ safe filter has been independently tested and certified.

* German Environment Agency 2021

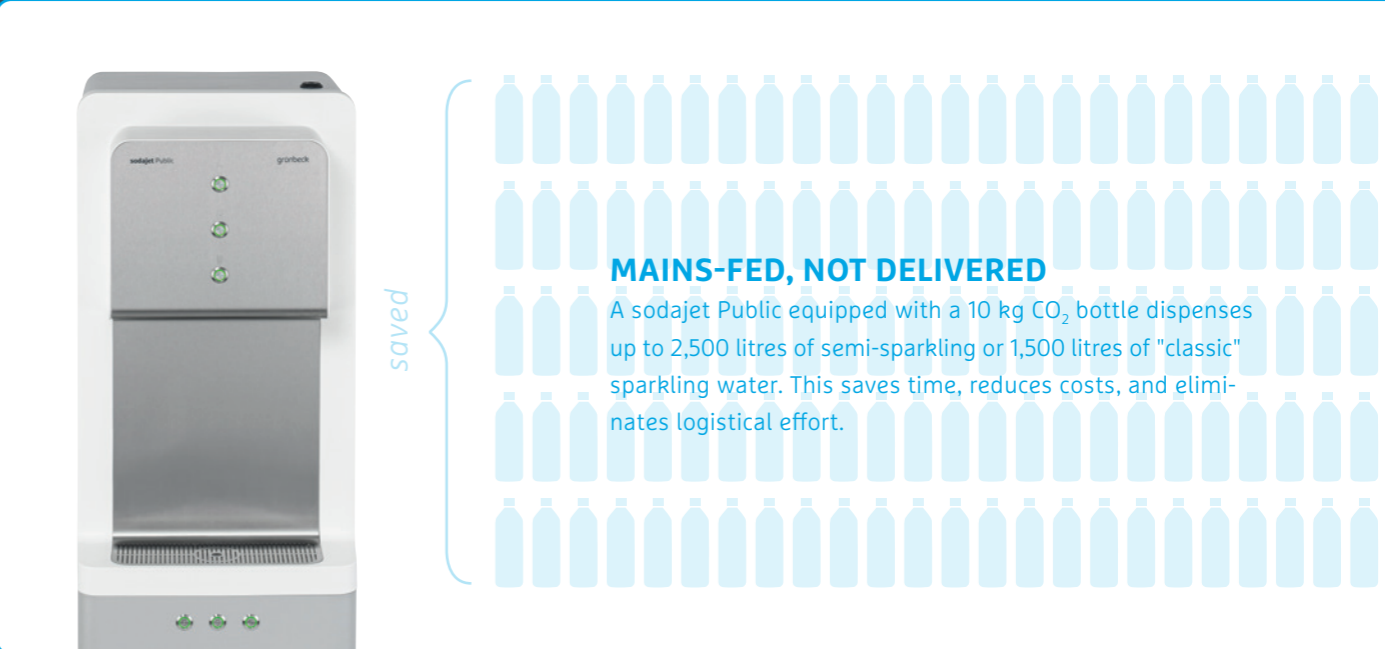

Water with a conscience

from source to glass, without the middleman

Did you know that in Germany, nearly 2 million single-use plastic bottles are used every hour? That's more than 45 million bottles per day and around 16.4 billion a year. As a rule, these bottles are manufactured from finite resources such as crude oil. This represents an enormous load on the environment.* But convenience and freshness don't have to mean a sea of plastic.

Tap into what's already there: your mains water supply. Thanks to an extensive network, clean water is accessible almost everywhere – and usually in unlimited quantities. So why not capitalise on this and use sodajet water dispensers to transform it into premium table water?

* www.duh.de

MAINS-FED, NOT DELIVERED

A sodajet Public equipped with a 10 kg CO₂ bottle dispenses up to 2,500 litres of semi-sparkling or 1,500 litres of "classic" sparkling water. This saves time, reduces costs, and eliminates logistical effort.

sodajet Public

robust and barrier-free

Our water dispenser for high-footfall locations with high water demand, such as:

- ✓ Care and healthcare facilities
 - ✓ Schools, nurseries, and childcare facilities
 - ✓ Sports halls and leisure centres
 - ✓ Community hubs and cultural venues
 - ✓ Workshops and manufacturing facilities
 - ✓ Other public institutions
- Durable, robust steel housing
 - Illuminated, vandalism-proof keys
 - Covered dispenser unit
 - Easy-to-clean surfaces
 - Ideal for bottles and glasses of all sizes
 - High level of efficiency and reliability
 - Chilled water in still, semi-sparkling, and sparkling options
 - Recessed, intuitive keys
 - Accessible in accordance with section 4.5.2 of DIN 18040
 - Universal icons
 - One-Box solution combines all components in one appliance
 - Accommodates all standard CO₂ bottles up to 10 kg

sodajet Office

efficient and versatile

Our water dispenser for professional environments and client-facing areas:

- ✓ Offices
- ✓ Tea points and kitchenettes
- ✓ Showrooms and retail spaces
- ✓ Consulting rooms / surgeries
- ✓ Breakout areas and staff rooms

- Timeless design with high-grade surface finish and streamlined shape
- Quiet operation
- Illuminated keys
- Universal icons
- Covered dispenser unit
- Easy-to-clean surfaces
- Ideal for bottles and glasses of all sizes
- Chilled water in still, semi-sparkling, and sparkling options
- Compact tabletop design – no larger than a bean-to-cup coffee machine
- Optional base cabinet available

Our hygiene promise

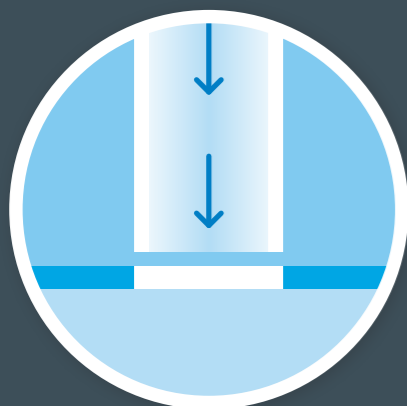

Standard and optional features for guaranteed freshness

Our customers' quality of life is our core priority. As a brand of Grünbeck AG, sodajet therefore delivers the highest standards of hygiene and quality. For your peace of mind, our water dispensers undergo rigorous microbiological testing conducted by independent external institutes. Trust over 75 years of expertise in water treatment and be confident that you are always enjoying flawless drinking water – with further customisation available through our optional features.

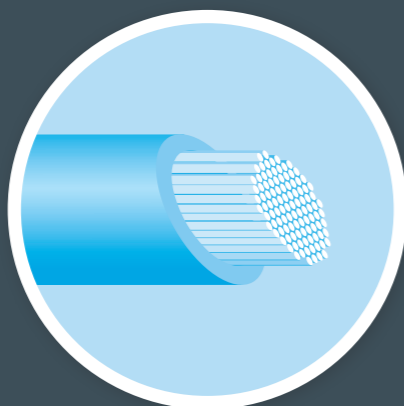

PROTECTED DISPENSER UNIT

Prevents accidental contact with the dispense tap, protecting against bacterial regrowth.

STERILE FILTER

Filters out 99.99999% of all bacteria from the water – even in challenging output water conditions.

AUTOMATIC HYGIENE FLUSHING DEVICE

Prevents stagnation and guarantees fresh water, even after extended periods of inactivity.

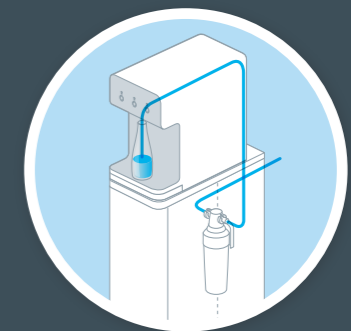

Upgrade for your sodajet table water

- ✓ **Superior taste**
clearliQ water filters significantly enhance the flavour of your water.
- ✓ **Resource-efficient**
Only the filter element is replaced regularly. The high-grade cartridge housing remains in place.
- ✓ **Effortless**
Filter changes are straightforward and only required twice a year.

The clearliQ filters are installed discreetly and out of sight: within the base cabinet for the sodajet Office, and inside the unit housing for the sodajet Public.

CLEARLIQ WATER FILTERS

remove impurities from the water, while activated carbon enhances both odour and taste.

clearliQ safe

Complete peace of mind: clearliQ safe not only reduces heavy metals, turbidity, and unpleasant tastes or odours – it also filters out 99.99% of bacteria, including legionella and E. coli. This makes it ideal for supplying water to immunocompromised individuals, such as those in hospitals or other care facilities.

clearliQ comfort

This filter is ideal for reducing water spots on surfaces, glassware, and carafes. At the same time, it provides reliable limescale protection for your appliance, ensuring long-term, flawless performance. Depending on your water consumption and raw water hardness, you can choose between sizes M or L. And, of course, the filter also ensures great-tasting drinking water.

Filter reduces ...	clearliQ safe	clearliQ comfort
Unpleasant taste and odour (e.g. chlorine)	✓	✓
Turbidity	✓	✓
Heavy metals (e.g. lead)	✓	✓
Bacteria (e.g. E. coli)	✓	—
Scale	—	✓

For both sodajet appliances, we offer attractive models for purchase or hire.

80,000 PET bottles saved
FC Augsburg champions sustainable hydration

4 steps to a sustainable water supply

1. Please contact your local Grünbeck representative for a tailored consultation.
2. Based on your specific water consumption, we will calculate the most cost-effective solution and provide a proposal customised to your requirements.
3. Our factory-trained technicians will assess the installation site and complete the commissioning of your sodajet water dispenser.
4. Upon request, we can also provide regular servicing and maintenance for your sodajet appliances.

Since 2024, three sodajet water dispensers have been providing approximately 120 employees at the FC Augsburg's head office with fresh, locally treated water. By using these appliances, the club saves around 80,000 PET bottles per season – a powerful commitment to environmental protection in action.

"With our unique local connection to the UNESCO World Heritage 'Water Management System of Augsburg', FC Augsburg has anchored water as a central focus of its sustainability strategy. Our partnership with Exclusive Partner Grünbeck plays a vital role in achieving this", says Michael Ströll, CEO of FC Augsburg.

The sodajet water dispensers offer a practical and sustainable solution: fresh table water at the touch of a button – without the need for heavy lifting, storage, or disposal.
