

# A pool for highest demands

**Customer** Private customer

**System** Twin filter system GENO-mat F 800 A ECO

## Description

A stainless steel pool that leaves nothing to be desired. Thanks to a movable floor, the water's depth can variably be adjusted from 0 to 1.40 m. When retracted, the pool floor is completely covered, can be walked on and is adapted to the design of the high-quality patio slabs.

## Scope of supply

Twin filter system GENO-mat F 800 A ECO with a frequency-controlled circulation pump to adapt the required filter capacity. Automatic measuring and control system with dosing pumps for demand-based dosing of care products. Visualisation of the measured values on a tablet or PC via KNX bus.  
Pool dimensions: 17.00 x 5.50 x 1.40 m
