System Ultrafiltration system spaliQ:UF150 for crystal-clear water in mosaic pool

Scope of supply

- Built-in pool parts
- Ultrafiltration system spaliQ:UF150, capacity 15 m³/h
- 1 Raw water tank with a volume of 4 m³
- 1 Measuring, control and dosing technology

Description

Surrounded by buildings in a traditional architectural style, a swimming pool with state-of-the-art technology was created here. The pool measuring 8.50 x 3.50 x 1.35 m, features an overflow channel on three sides. Thus, users have an unrestricted view of the property even when swimming. The blue glass mosaic is

reflected in the water and stands out from the pool edge. A polycarbonate solar shutter pool cover was installed for optimum energy storage. When using the counter-current system, even athletic swimmers will find the perfect counterbalance to a stressful day.
